Neil,

Might I suggest an internal discussion, in order to put a time line on what Ford has actually submitted and when it was submitted. EPA review clock, begins when a complete package has been submitted. I believe that Ford's complete technical description was submitted on 1/13/10. Please send an electronic copy of the owners / operators manual.

We will update our application later this week to include the new DFs and forward it to you. Please note that our target for certification is 2/04/2010 and must have cert by our full production date of 2/15. We have been forwarding our AECD materials to EPA and not heard EPA raise any concerns. If we get the revised application out to you later this week, is there any reason we would not be able to obtain cert approval next week?

Thanks.

Neil,

The Agency does not have a problem with the proposed actions for
Ford's
DF.

I should also note that we reviewed with ARB. They asked for the test data, but indicated they saw nothing in our presentation that would give them heartburn.

Subject: RE: Mtg Request - Teleconf - Ford HDDE DF

We have completed our LHDDE DF testing to 50% FUL, as agreed in August 2009. Because the production-intent calibration has changed somewhat from what we launched the engine with, however, we made a few changes at the 50% FUL point to make certain we have a representative DF. First,

CBI / Ex. 4

The resulting DFs are production-representative and we'd like to proceed to unconditional cert with those DFs.

Production dates are quickly approaching. Hence, if we need to meet, we'd like to set something up soon. Otherwise, please send your concurrence with our proposal to use these DFs and we'll proceed to update the application.

Thanks.

Neil,

Compose an e-mail that details the issues. After an internal review, if there are still questions, we'll request a meeting.

We'd like to set up a teleconference with you and Greg to discuss status of our 2011MY HDDE DF engine. We have completed 50% FUL testing with some adjustments and wanted to review w/ you to make certain all is OK. We have additional testing to conduct on the engine, but are holding up any additional work until we discuss DFs with EPA. When would you be available next week for a 30-45 min. teleconference? We will be

off on
Monday.

Thanks.
